

# JUUNOO SPEC SHEET

## DEMOUNTABLE WALL

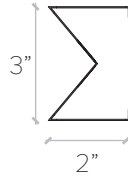

### FRAMING

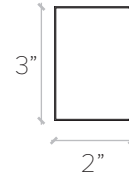

Juunoo modules are made from S250GD – galvanised steel. Our guarantee to you is that at least 40% of this steel comes from recycling processes. All modules are composed of 2 telescopic pieces that can be infinitely adjusted. The vertical modules (I & C) have a ‘Quickspan’ lever that tensions and fixes the stud in place when closed.

DEMOUNTABLE WALL

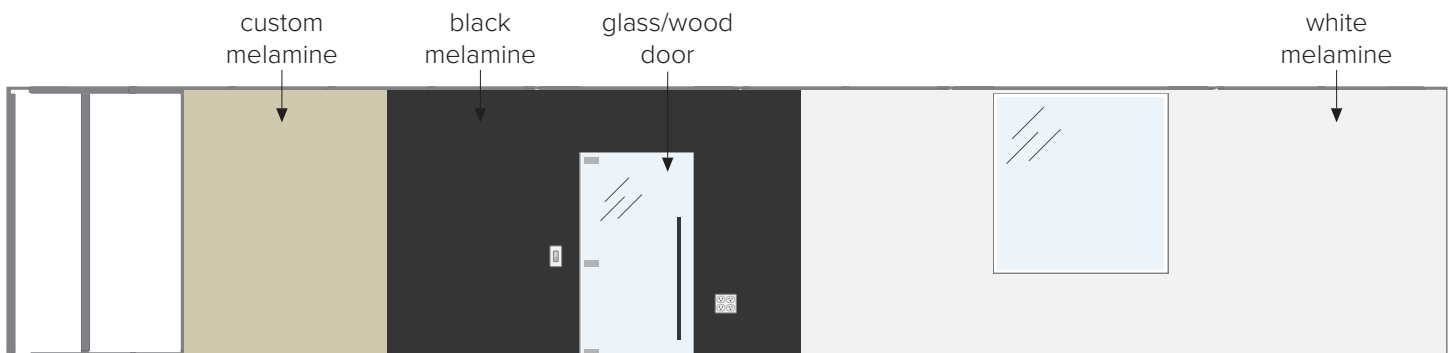

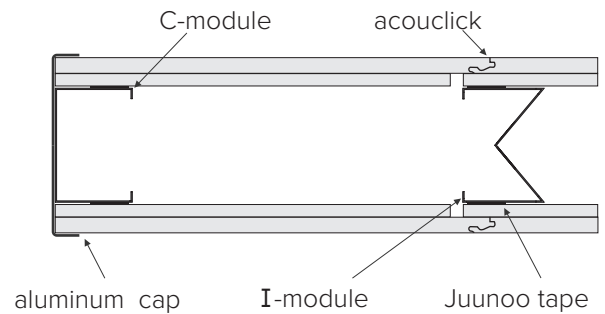

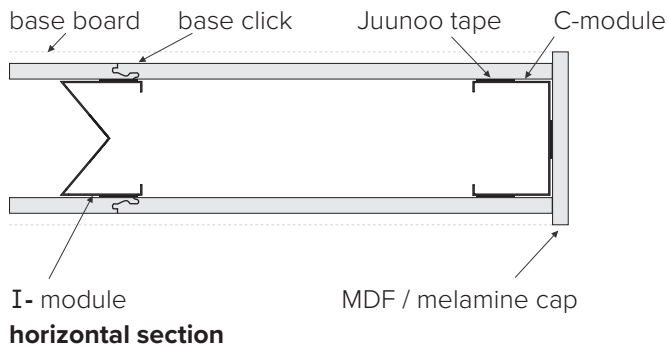

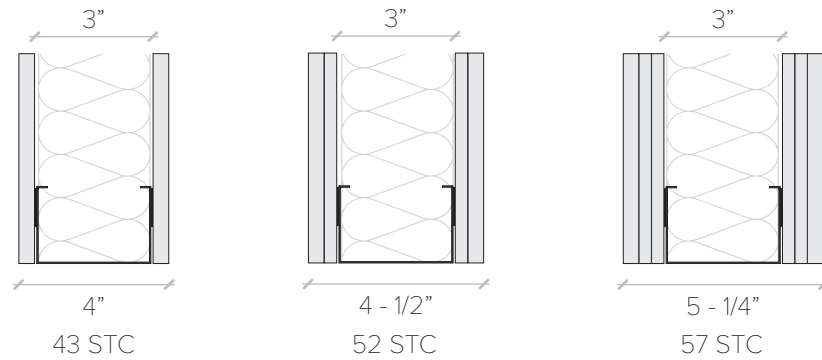

**CLICK PANEL**

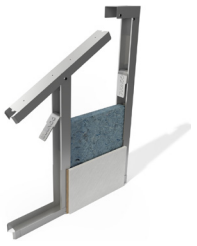

The structure is preferably covered with click panels. They have a melamine finish that is available in many decors. The panels are clicked in one another by their seamless tongue and groove connection. The panels are adhered to the modules with the JuuNoo-tapes.
